

## Function Block Parameters: selector

### Selector

Select or reorder specified elements of a multidimensional input signal. The index to each element is identified from an input port or this dialog. You can choose the indexing method for each dimension by using the "Index Option" parameter.

### Parameters

Number of input dimensions:

Index mode:

	Index	Option	Index	Output Size
1	Index vector (dialog)	▼	[1]	Inherit from "Index"

Input port size:

OK

Cancel
